

Summer Solstice

Trip; Trip

[VERSE 1:]

Since December things have changed
They've warmed and grown and rearranged
Now the sun stands so way up high
Though summer's here I can but sigh
Ready today for winter's night

[CHORUS:]

Summer Solstice, if you've noticed
Please take care, lest we despair
Warm summer air, not always fair
Seal up the jar, wish on a star
Winter's not far, belly to the bar

[VERSE 2:]

Cricket and ant see it their ways
A diff'rent take on summer days
I have no mind your fun to mar
But you know cold weather not far
Stash it tightly in a glass jar

[CHORUS]

[VERSE 3:]

Peak of summer, sharing our lore
Hope you don't think that I'm a bore
Plant your garden sow seed in ground
Let life spring forth from a dirt mound
Cycles of life go 'round and 'round

[CHORUS]
