

Carbon and Silicon

Trip; Trip

[VERSE 1:]

World of carbon and silicon
But how far have we really come?
Data moves at the speed of light
Will it all really turn out right?

[CHORUS:]

Carbon's in bone
Carbon's in steel
Carbon's in oil
It's a part of ev-e-ry meal
Silicon's in chips
Silicon to seal
Silicon's in lips
It makes falsity seem so real

[VERSE 2:]

World of carbon and silicon
But what has mankind really done?
Making stuff all the day and night
Have we pushed nature out of sight?

[CHORUS]

[VERSE 3:]

World of carbon and silicon
Is our world any more fun?
War is such a terrible fright
When will man ever see the light?

[CHORUS]

[BRIDGE]

Carbon is all that's left when everything's burned
We've made up so much but what have we learned?
Rainforests burn, ocean's a dump
Eight seasons turn, world's left a lump
Birds fly above, horses still jump
What of our love, forest's a stump
Silicon's the look so many have yearned
Natural order artificially churned

[VERSE 4:]

World of carbon and silicon
From the earth the stuff is on loan
Try and try and try as we might
Evil forces put up their fight

[CHORUS]

[VERSE 5:]

World of carbon and silicon
Feels like I'm in The Twilight Zone
Higher higher just like a kite
Kick back or boogie it's all right

[CHORUS]

[REPRISE:]

And what about mankind's blood sweat and tears?
Can technology conquer our fears?
